STEM Santa Fe is a nonprofit organization that encourages young women to pursue science, technology, engineering, mathematics (STEM) careers. The ultimate goal is to motivate girls to become innovative and creative thinkers ready to meet 21st-century challenges.

This year our program STEM Pathways for girls kicks off with a day-long conference for 200 girls in grades 5-8 with an inspiring keynote address, hands-on workshops in STEM and related fields. In a fun, supportive environment girls meet peers who are also interested in STEM fields and learn from female STEM professionals in careers that may include earthquakes, water resources, robotics, DNA, light and lasers, coding and internet networking.

Register online at www.stemsantafe.org
